PLAN FOR PEACE IN THE MIDDLE EAST

The Center for Perpetual Diversity (CPD) has developed a plan to achieve permanent peace in the Middle East. Our experts see the possibility that Israel will be abandoned in 10 to 20 years because it will be too costly for the United States to maintain. Furthermore, when American Muslims outnumber American Jews three to one the United States will lose the political will to support Israel as predicted in *White Flight*, by J.F. Schneider. This will happen sooner than many expect. Although it is not a pleasant thought, we need to consider all scenarios to be fully prepared for the future and avoid disaster.

The World community should consider this plan very seriously because no other plan has any chance of long-term success. There are three major parts to this plan as described below.

1. Israel would be relocated to Europe. A small token piece of territory near Jerusalem would remain under Jewish control. This piece of land would be 100% Jewish and no other people could ever live there. It would be no more than 10 square km. Its purpose is to satisfy biblical prophecy for those who interpret the Bible that way. All other land now known as Israel would become Palestine.
2. Germany and Poland would give up some of the territory which was German prior to World War II. Some of the land formerly called East Prussia would be ideal or perhaps part of Western Poland. The area would be about half of the land mass of Israel. This land would become the new Israel. This part of the plan can be thought of as a final reparation payment (from Germany and Poland) for the Holocaust. Over time Israel would agree to pay back all of the money it received from Germans for the Holocaust and agree not to ask for any money from Poland. It would be very appropriate that the countries in which so many Jews perished would be credited with saving them. New Israel would ultimately need to be 100% Jewish, just as the rest of Europe would need to be Christian or atheist and White. Non Jews living there now would be encouraged to switch places with Jews living in other parts of Europe.
3. All Muslims, Arabs and other non-Europeans would leave Europe and never be able to return. Not even as tourists. This could be done over five to ten years to minimize impact on individuals. "Converting" to another religion (like using hair dye or plastic surgery to make superficial changes) would not permit someone to stay.

The CPD Peace Plan is the only plan that will guarantee safety for Jews and Europeans as well. If such drastic action is not taken within ten or twenty years Israel will certainly be overrun by the Muslims. After this final holocaust the Muslims will focus their attention on Europe, where they already have a strong foothold. By the year 2025 it will be too late to save Europe without a major war. The Center understands that Islam is one of the world's great religions, some of whose followers promote love and peace. However, we are interested in maintaining religious diversity as well as cultural and ethnic diversity and don't want to see one religion spread all over the planet.

Although currently hard to imagine, by the end of this century the few remaining Jews and Christian Europeans in Europe could be faced with the same dilemma which whites recently faced in Zimbabwe. This must be avoided at any cost. For more information on this grave situation I recommend reading 'The Death of the West' by Patrick Buchanan. Western civilization is in decline; we must retreat to a more defensible position. Canada and even the United States may ultimately be lost before this trend is reversed. European governments must be convinced to act now while still somewhat strong.

Please do all you can to promote this plan. Feel free to copy and distribute this to appropriate government officials.
